# AIPULNION<sup>®</sup>

### DC-DC Converter KW6-XXDXXE2C3 Series

### **Typical Features**

- Wide input voltage range (4:1), Output Power 6W
- Transfer Efficiency up to 84%
- Continuous Short Circuit protection, Self-recovery
- Protections: Input under voltage, output over voltage, short circuit, over current
- Switching Frequency 450KHz
- Isolation Voltage 2250 VDC
- Operating Temperature: -40°C~+85°C
- Good EMI performance

# AIFILIL NICN® AIFILIL NICN® KWG-XXDXXE2C3 RoH5 RoH5

CE RoHS

#### **Application Field**

**KW6-XXDXXE2C3** The newly developed DC-DC module power supply for our company, SIP package, 6W output power, ultra-wide voltage input range, ultra-low standby power consumption, isolated and regulated single output, can be widely used in industrial control, instrumentation, communication, Electricity, Internet of Things, BMS and other fields.

Typical Product List

1. The maximum capacitive load refers to the capacity of the capacitor that is allowed to be connected when the power supply is fully loaded. If the capacity is exceeded, the power supply may not be able to start;

2. In order to reduce the no-load power consumption and improve the light-load efficiency, the IC works in the state of frequency jitter at no-load and light-load, and the output cannot be no-load. At least an electrolytic capacitor with a 10% load or a high-frequency resistance above 470uF is required, otherwise Will cause the output voltage ripple to increase;

3. With "C", it has control pin function;

### Ripple& Noise Test: (Twisted Pair Test Method 20MHz bandwidth)

1.12# twisted pair to connect, Oscilloscope bandwidth set as
20MHz, 100M bandwidth probe, terminated with 0.1uF
polypropylene capacitor and 10uF high frequency low resistance
electrolytic capacitor in parallel, oscilloscope set as Sample pattern.

2. Output Ripple& Noise Test Method:

Input terminal connect to power supply, output terminal connect to electronic load through jig plate, Use 30cm±2 cm sampling line, Power line selected from corresponding diameter wire with insulation according to the flow of output current.

#### Application reference:

1. It is recommended to output a minimum of 10% load or connect an electrolytic capacitor with a high-frequency resistance above 470uF, otherwise it will increase the output voltage ripple;

- 2. It is recommended that the load imbalance of dual output products is less than  $\pm 5\%$ ;
- 3. The maximum capacitive load is the result of the pure resistance full load condition test;
- 4. Our company can provide overall power supply solutions, or product customization;

### Product characteristic curve

### **Design reference application**

### **Recommended circuit**

### 1.DC/DC test circuit:

Normal recommended capacitors:C0:47-100uF; C1,C2:470uF.

### 2. Input reflecting ripple current test circuit::

Capacitor C choose low ESR ones, withstand voltage value should be bigger than max input voltage;

### **3.EMC** external recommended circuit:

| LCM2, LCM3 | 30uH                            | 30uH              |  |
| C4, C6     | 47uF/50V                        | 47uF/50V          |  |
| CY1,CY2    | 2.2nF/2000V                     |                   |  |

Note:

1. The product should be used under the specification range, otherwise it will cause permanent damage to it.

2. If the product worked beyond the load range or below the minimum load, we cannot ensure that the performance of product is in accordance with all the indexes in this manual;

3. Unless otherwise specified, data in this datasheet should be tested under conditions of Ta= $25^{\circ}$ C, humidity<75% when inputting nominal voltage and outputting rated load(pure resistance load);

4. All index testing methods in this datasheet are based on our Company's corporate standards

5. The performance indexes of the product models listed in this manual are as above, but some indexes of non-standard model products will exceed the above-mentioned requirements, and please directly contact our technician for specific information;

6. We can provide customized product service;

7. The product specification may be changed at any time without prior notice. Please pay attention to the latest manual published on our official website.
